

### ***Letter of Recommendation for Mr. Adnan Sardi***

It is truly a great pleasure to write this letter supporting Mr. Adnan Sardi's application to your institution. I have known Adnan in an excellent capacity. He was my student in the Data Analysis training program where students and graduates from high-ranking universities with different levels of education join in order to learn how to analyze data by doing 4 project presentations. He was one of the most creative and smartest students in the class in every means.

Team-working and collaboration in leading the projects are highlighted and improving over time in our class since different students from various countries participate.

As his tutor, I have had an opportunity to observe his participation and interaction in class to evaluate Adnan's knowledge of the subject matter. His proactivity, good staging, and fast learning skills prepare him beautifully for the program of your Institution. My highest recommendation goes to your program and I support him in getting any financial assistance available.

Best regards,

**Dr. Elnaz Gholipour**  
Lecturer & Researcher  
Industrial Engineering Department  
EMU University
